

Sweden

- Highly federated health care system
 - 21 self-governed regions with taxation rights
 - Private care providers; publicly financed private provided, and private-private
- National-level IT development largely driven by the regions
- HL7 FHIR level of implementation is uneven and increasing
 - National Medication List
 - Vendor community
 - Regional developments

HL7 Sweden base profiles

- Four profiles (and increasing)
 - Patient, Practitioner, PractitionerRole, and Organization
 - Also 2 data types, 3 extensions, 10 value sets
- v1.0.0 published March 2023

- Language package (translations) in development
- v1.1.0 code freeze in March 2025
 - Updates to Patient, Organization profiles
 - Bugfixes
- v2.0.0 in development

HL7 Sweden vs. HL7 Europe

- A task force for alignment with European specifications
- HL7 Sweden profiles add only Sweden specific data
 - Swedish naming and code systems, etc.
- Not compatible with EU Core
