

Observation Device - what should it be?

Ralf Herzog

Shaping the Future of FHIR® in Europe

Working Group Meeting
1-5 December 2025
Cologne, Germany

Observation Device - what should be in what not?

Out of the eHealth Network Guideline on Lab

A.5.2.5	Observation device	Device (analyser), laboratory test kit and used calibrator information (identifier, type, name, model, manufacturer)	SNOMED CT EMDN
---------	--------------------	--	-------------------

What Devices are involved in Lab Result Creation?

- (Lab) Analyzer
- Test Kit
- Calibration Kit (?)
- QC (?)
- Disposables (most likely not)
- System Fluids (most likely not)

Thoughts?

How should these be identified?

Do we need perhaps a mapping?
